

Wheel guides

The **wheel guides or truck guides help the driver during coupling**, making it easier for the truck to position itself straight at the loading and unloading point. Thus avoiding damage to the vehicle, the leveller and the dock shelter, and ensuring an efficient seal.

Characteristics

- ✓ We have **two types of wheel guides: open or straight**, depending on the needs of the loading area.
- ✓ Ready to be weld or screw.
- ✓ Anticorrosive finish in yellow or hot-dip galvanized.
